

JAMMA Fingerboard JB-1

Custom Wires Kit

Created by JammaBoards.com

You will receive a full assortment of wires which are custom picked for our JAMMA Fingerboards/Adapters. Every wire is top notch quality all the way, color coded and striped at each end! You will not have to strip any of these wires, all are stripped back the perfect length for through-hole soldering! All chassis type (Buttons, Switches, Controllers, etc.) wiring is AWG#22. All power wires are AWG#20...and we include plenty of +5VDC & Ground wiring for multiple current paths. We suggest using every available power transmission path between the JAMMA Adapter and attached connector(s). This is to ensure full electrical safety compliance.

Wire Specifications:

Total Wire Quantity	58 pieces.
Total Wire Length	Approx. 10 inches (250mm)
Wire Striped Length	30mm
Gauge Sizes	AWG#20 - AWG#22
Wire Type	Single Stranded

Itemized Chart:

Quantity	Gauge	Color	Assignment
6	AWG#20	RED	+5VDC
6	AWG#20	BLACK	GROUND
4	AWG#20	ORANGE	-5VDC
4	AWG#20	YELLOW	+12VDC
6	AWG#22	GREEN	VIDEO (+1)
8	AWG#22	PURPLE	BUTTONS
8	AWG#22	BLUE	CONTROLLER
12	AWG#22	WHITE	ALL SWITCHES (+1)
4	AWG#22	GRAY	SPEAKERS (+2)

** In Assignments columns, the listings with (+1) or (+2) are referring to the amount of extra wires you will receive in this color group.
